Education

Exchange	École Centrale de Lyon , Mathematics	Lyon, France
Program	- Stochastic calculus and stochastic differential equations, analysis and modeling of PDEs. - Convex optimization, sparsity, statistics, deep learning, machine learning.	2025 – 2026
Bachelor of Mathematics	Université Claude Bernard Lyon 1 , Mathematics	Lyon, France
	- Probability, measure theory, topology, introductory functional analysis, differential calculus. - Linear algebra, differential equations, group theory, rings and fields.	2022 – 2024
Grandes Écoles	lyon business school , Data Science	Lyon, France
Program	Statistics, artificial intelligence, data science, economics.	2022 – 2026
Préparatoire	Lycée Michel Montaigne , Economics and Mathematics	Bordeaux, France
	Mathematics, economics, philosophy, literature.	2020 – 2022

Experience

Inria, CNRS, IRISA , PhD Candidate (incoming)	Rennes, France
PhD supervised by Nicolas Keriven (CNRS) and Titouan Vayer (Inria), entitled "Invariance and Transferability in Generative Models".	2026 – 2028 2 years
Inria, CNRS, IRISA , Research Intern	Rennes, France
Six-month research internship supervised by Nicolas Keriven and Titouan Vayer , on invariance of generative models and transferability of set-based generative models.	Apr 2026 – Sept 2026 7 months
Schneider Electric Sustainability Business, R&D Department , Data Scientist Intern	Paris, FranceMadrid, Spain
- Co-authored an internal research article on machine learning models of greenhouse gas emissions. - Modeled organic carbon sequestration in agricultural soils. - Co-supervised a student capstone project in data science with Institut Polytechnique de Paris.	Oct 2024 – Aug 2025 1 year
Université de Montréal, Department of Mathematics and Statistics , Research Intern	Montréal, Canada
Supervised by Florian Maire.	Aug 2023 – Dec 2023
- Studied "Unbiased Markov Chain Monte Carlo Methods With Couplings" and implemented the methods in Python. - Presented the paper to about 20 PhD students and researchers in the department.	6 months
